

Watson Fothergill.

Fothergill Watson (he later changed his name to Watson Fothergill) was one of the leading local architects practising in the Nottingham area from about 1870 to 1906. During these thirty or so years he designed over a hundred buildings including houses, banks, churches, shops and warehouses, many of which still survive today. He worked in the Gothic revival and Old English vernacular styles, very popular in the Victorian times. These styles were loosely based on medieval churches and castles, and 16th & 17th century tudor buildings

Fothergill Family Home
7 Mapperley Road

Fothergill built this striking Gothic house in 1871-72 for his growing family. It was very characteristic of his early style - tracery in the windows, star motifs over the doors and windows, towers, finials and tall ornate chimneys.

Fothergill and his family lived here until his death in 1928, when the house was sold.

It was torn down in 1968 after years of sad neglect,
